🔭 Scope

Description

```
In the twilight archives of Eldoria, Nyla studies an image of an ancient Celtic cross. Her
enchanted crystals illuminate the intricate carvings as she searches through forgotten
tomes. The cross stands at a crossroads of realms and time, its weathered surface telling
tales older than Eldoria itself. As her magical threads of knowledge connect across
centuries, the true name of the monument emerges in glowing script before her eyes.
Another mystery solved by the realm's most skilled information seeker, who knows that even
stone can speak to those who know how to listen.
```

Download files

```
A folder created from a Macbook with an picture :

└─$ tree Echoes-In-Stone
Echoes-In-Stone
├── echoesinthestone.png
└── __MACOSX
```

Toute reproduction ou modification sans l'accord explicite de son auteur est interdite.

1.3 🤯 Exploitation

First, let's check the file format :

```
└─$ file echoesinthestone.png
echoesinthestone.png: PNG image data, 888 x 806, 8-bit/color RGBA, non-interlaced
```

Next, let's try extracting information with imagemagick :

```
└─$ identify -verbose echoesinthestone.png
Image:
  Filename: echoesinthestone.png
  Permissions: rwxrwx---
```

Toute reproduction ou modification sans l'accord explicite de son auteur est interdite.

```
  Format: PNG (Portable Network Graphics)
